

# YOUR GUIDE TO APPSEC WITH VERACODE

## SECURING TODAY'S APPLICATION ECONOMY

Software is the engine that powers every agency. Big Data, Cloud, Mobile, Social Networking, and the Internet of Things all run on software that not only represent a key source of innovation, but one of the largest attack surfaces for hackers.

## THE CHALLENGE

### Application Layer

More than **50%** of all attacks now target the application layer, while fewer than **10%** of agencies test all of their business critical applications.

Network

Web/App Server

Database

Operating System

## THE SOLUTION: AN INDUSTRY LEADER WITH TRUSTED SOLUTIONS THAT WORK

Veracode provides a secure cloud-based and fully automated Application Security Platform that offers scalable solutions for customers to mitigate risk across their entire application portfolio

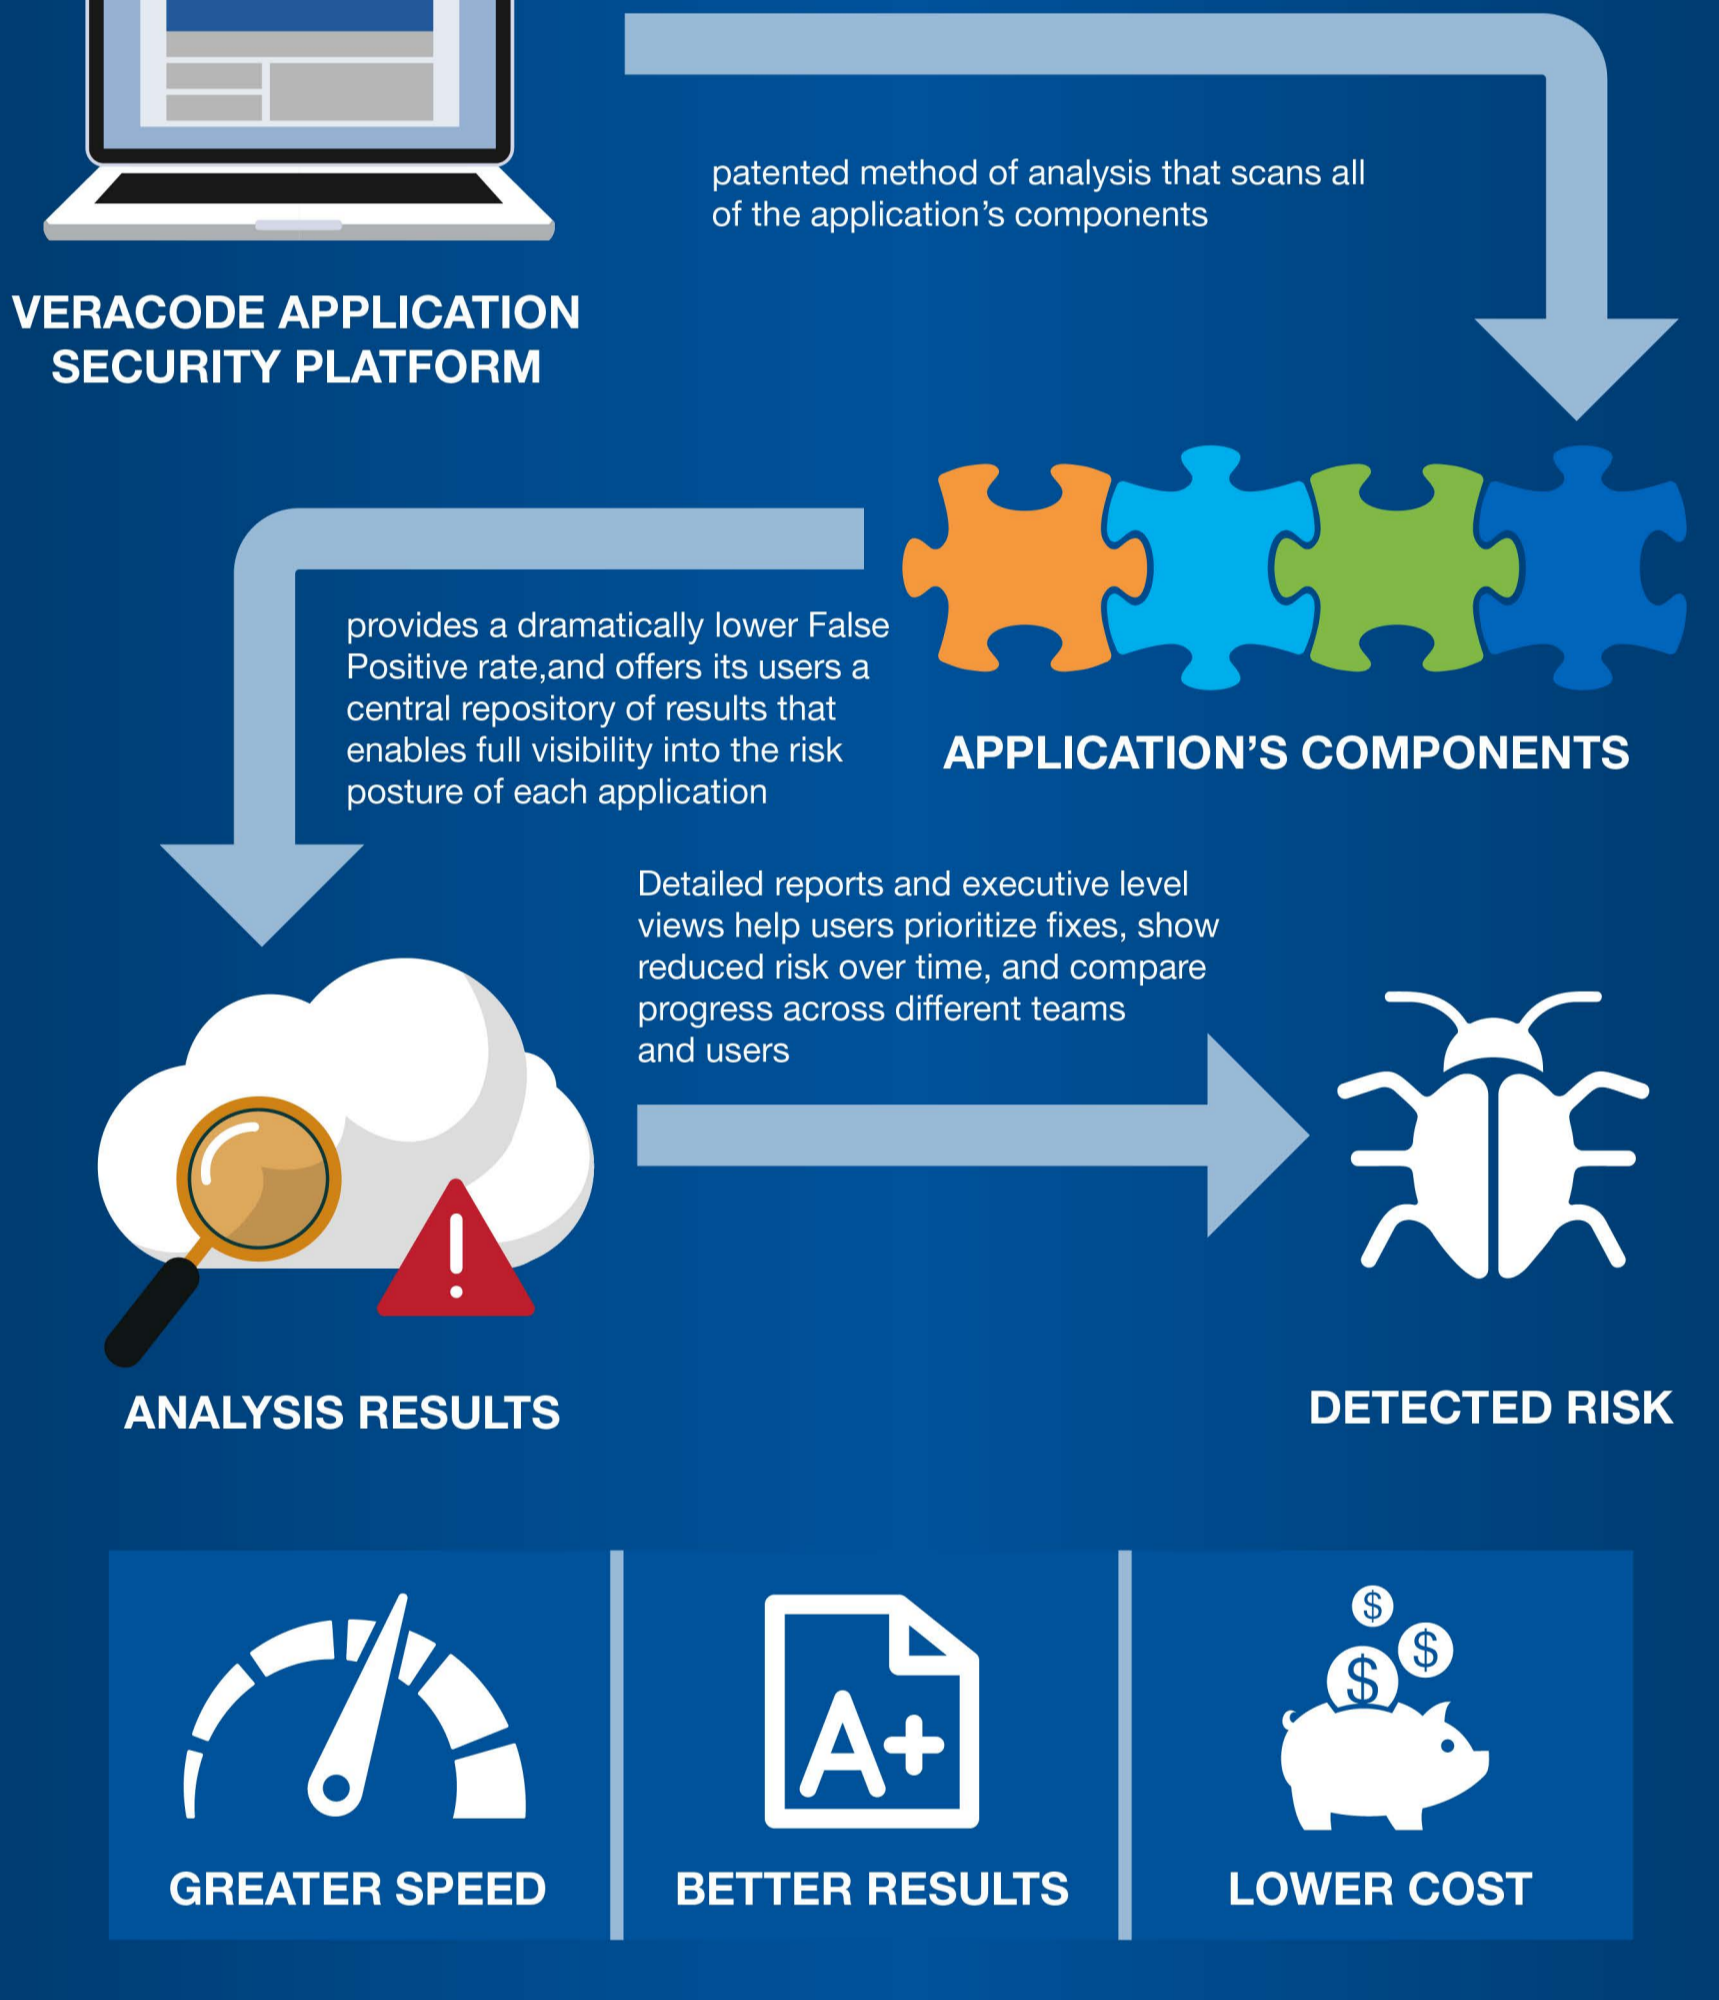

## VERACODE: WHAT THE INDUSTRY EXPERTS ARE SAYING

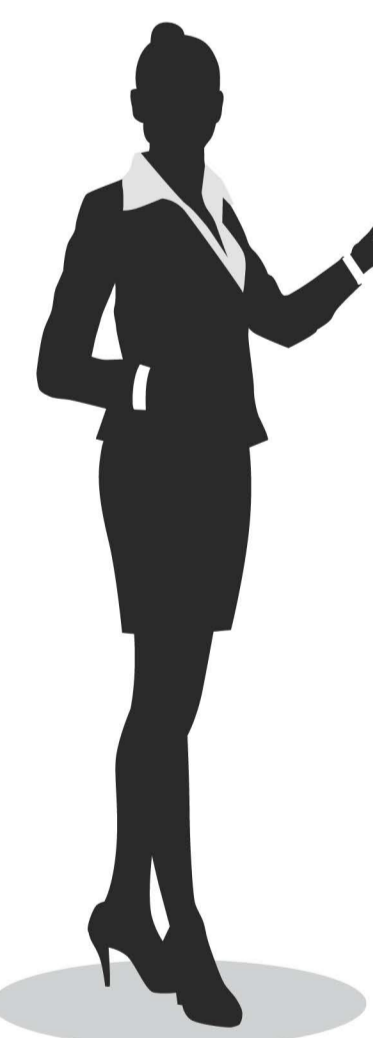

Veracode is a Gartner Magic Quadrant and Forbes listed leader in securing web, mobile and third-party applications for the world's largest global enterprises. By enabling organizations to rapidly identify and remediate application-layer threats before cyberattackers can exploit them, Veracode helps enterprises accelerate their innovations to market – without compromising security.

## HOW DOES IT WORK?

## WHAT VERACODE OFFERS: INTEGRATED SUITE OF APPLICATION SECURITY PRODUCTS & SERVICES

### VERACODE PRODUCTS

- ✓ Static, Dynamic, and Manual Penetration Testing
- ✓ Third-party Component Testing: for your open source and COTS software
- ✓ Mobile Application Testing: including both Static and Behavioral Analysis results
- ✓ Web Application Perimeter Monitoring: for all of your external facing websites
- ✓ Vendor Application Security Testing: and program management for your third-party software supply chain
- ✓ DevSecOps Testing: with our newest feature Greenlight, which enables developers to test code and receive results within seconds not hours or days like traditional on-premise tools

**Coming Soon!** Runtime Application Self Protection: which will sit on your server and block and catalogue attacks as they happen including Cross-Site Scripting attacks.

### VERACODE SERVICES

#### REMEDATION ADVISORY SERVICES

Help security and development teams better understand the risks inherent in their software and provide best practice guidance to fix flaws

#### INSTRUCTOR LED TRAINING

"Live" training sessions (60-90 minutes), delivered remotely via WebEx, leveraging a reusable curriculum (consistent with the eLearning content)

#### SECURITY PROGRAM MANAGEMENT

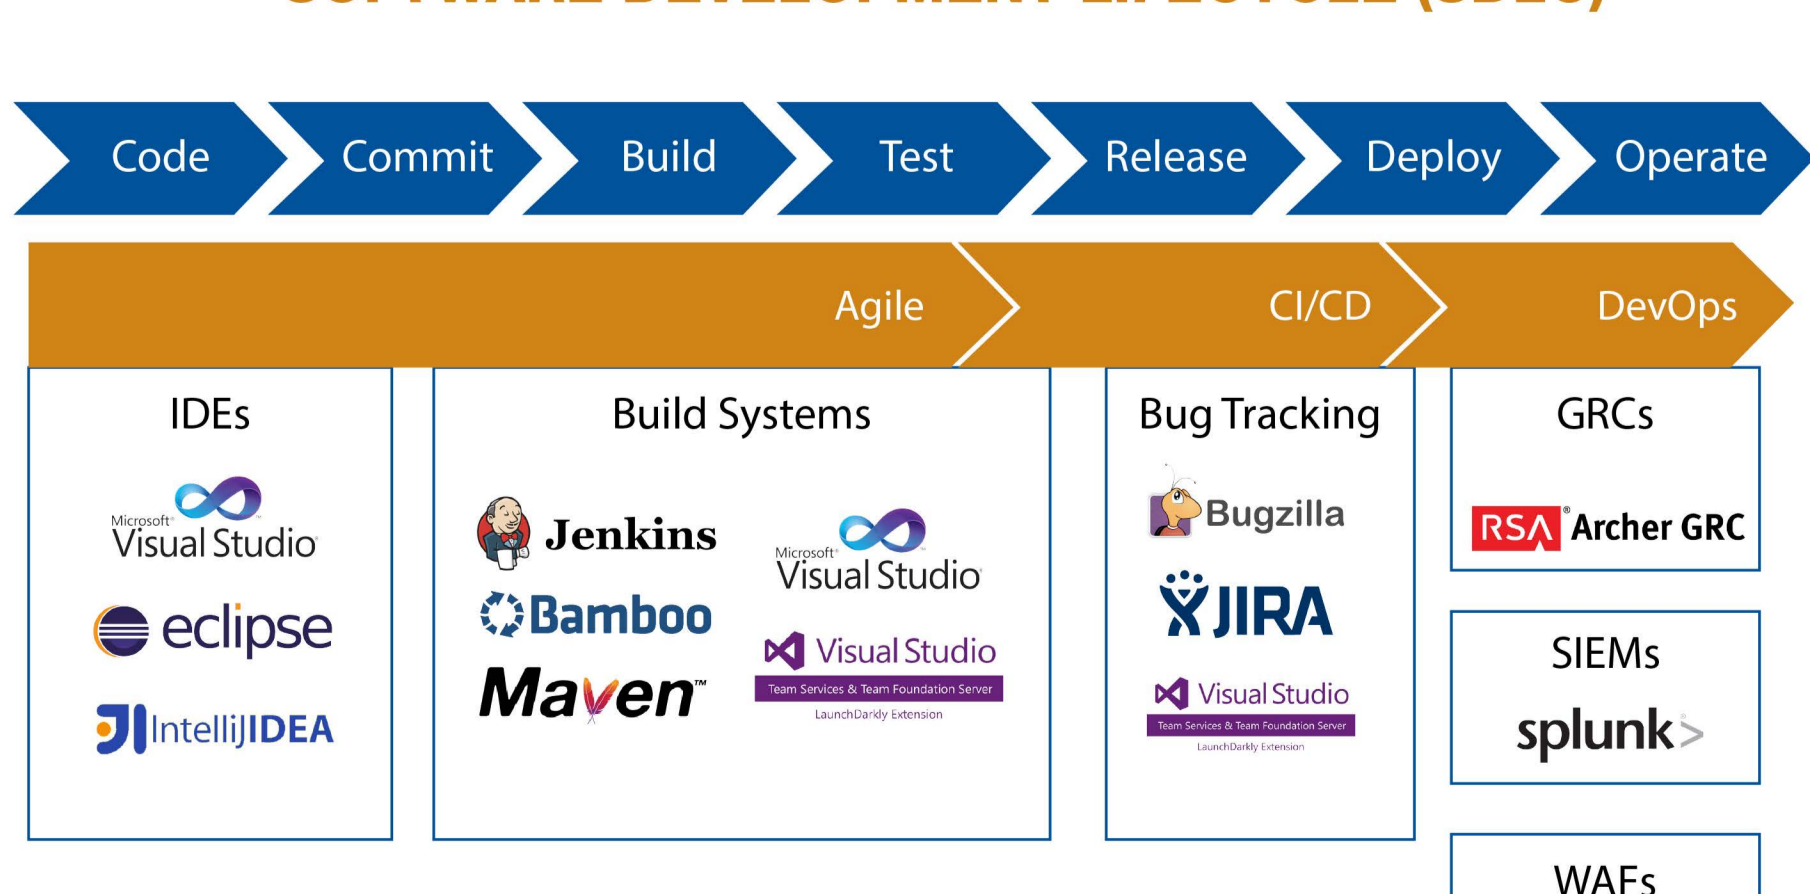

Let industry leading Veracode Security Program Managers augment your security team by helping you design, develop, and deploy your AppSec program. They will help educate, train, and onboard your development teams and track your AppSec operations to ensure you reduce the overall risk to your application portfolio.

#### PENETRATION TESTING

The Veracode team will cover the remaining flaws like the OWASP Top 10, SANS Top 25, and other flaws that might not be covered by automation

## HOW VERACODE INTEGRATES INTO YOUR SOFTWARE DEVELOPMENT LIFECYCLE (SDLC)
