

BIM 360 DESIGN QUICK START

You've made a smart decision. BIM 360 Design improves productivity, reduces rework, and accelerates project delivery through real-time Revit cloud worksharing and collaboration.

Set yourself up for success from day one with our BIM 360 Design Quick Start. We'll help you avoid common pitfalls, such as improperly configured settings causing model access issues for your users, by ensuring the successful configuration and application of BIM360 Design to an initial project.

Our expert consultants designed the quick start process to take the guess-work out of implementing and rolling out BIM 360 Design, allowing you to achieve positive ROI and seamless productivity right out of the gate.

WHAT'S INCLUDED

Initial Setup

- ✓ Activate the BIM 360 account & assign account admins
- ✓ Assign up to 12 users to the BIM 360 Design entitlement
- ✓ Guide users through the installation of the Desktop Connector add-in
- ✓ Assist with creating a new project, activating services, inviting team members, and enabling a model on BIM 360's Revit Cloud Worksharing feature

Virtual Education

- ✓ A structured, 4-hour virtual lecture on general features and functions of BIM 360 Design
- ✓ Includes an introduction to Account and Project Admin, Document Management, Revit Cloud Worksharing, sharing models through Design Collaboration, and QA/QC review tools

Project Team Assistance

- ✓ Customized, virtual coaching for your admins and/or users
- ✓ Four hours, structured how you'd like: Q&A sessions, step-by-step procedures, best practices guidance, or software instruction

Success Management

- ✓ Project Manager assigned to oversee Quick Start delivery
- ✓ Delivery process designed to ensure expectations are aligned and next steps are clear, from project initiation through close

By working with our team of expert consultants and leveraging our direct partnership with Autodesk, you are guaranteed that the very best people are focused on helping you maximize your software investment and save valuable time.
