

CADD MICROSYSTEMS CONSULTING SERVICES

When you work with us, you are guaranteed a team of experts dedicated to recognizing and solving your technical challenges. We'll save you valuable time while helping you maximize your Autodesk software investment.

PRODUCT MAINTENANCE

Our team can support your design software with updates, deployments, license management and troubleshooting. Let us focus on the software administration while you focus on your work.

CONTENT CREATION

We can save you time by developing custom content. If you need AutoCAD Dynamic Blocks or a library of families for Revit, or anything in between, our team of experts can build it to make your life easier.

ONE-ON-ONE INSTRUCTION

Not all training happens in the classroom. Our consultants can work with you side-by-side as you learn new software or procedures in the comfort of your office.

PROJECT TEAM ASSISTANCE

Let our consultants lend a helping hand and assist your project team with tasks like:

- Modeling and drafting assistance
- Step-by-step procedures
- Process documentation and training
- Documenting standards
- Drawing cleanup and updates
- Polylining
- Space verification and walk-throughs

COORDINATION ASSISTANCE

Let us work with your team before you break ground. We'll leverage your BIM models to look for clashes and report on them during design and preconstruction. We can review the issues with you and generate reports that you can take back to your team for resolution.

CUSTOM PRESENTATIONS

Stay up to date on the latest changes in technology. We can present on any of your current design software or technology - or tools you haven't yet used - such as AutoCAD, Revit, Civil 3D, InRoads, BIM360, Virtual Reality, COBie, and BIM.

STANDARDS DEVELOPMENT

The experts at CADD Microsystems have worked across the industry helping to align corporate standards to the functionalities in Revit, AutoCAD, and Civil 3D. Our services Include:

- Revit and AutoCAD templates
- Custom configuration files
- Custom content for AutoCAD or Revit
- Profiles and INI files to support your software
- Scripts and macros to make workflows easier
- Documentation for your BIM and CAD manuals
- and many more!
