Solutions Beyond Software
for Government Agencies

info@rand.com   800.356.9050   www.imaginit.com

The world is experiencing a period of rapid technological change. New technologies will reshape government workforces and change how government gets work done. When making technology decisions, buyers need to continually look for ways to increase efficiencies while constantly reviewing and improving processes.

Choosing the right tools for your projects is just the start. At IMAGINiT, our team of professionals understand how government agencies work, whether it's empowering an engineering team, maintaining assets, working with research and development activities, improving data management, or meeting ever-changing security standards. IMAGINiT's real-world experience with government requirements and regulations help provide successful solutions to agencies of all types.

Here are some of the ways that partnering with IMAGINiT will support your mission:

- Boosting productivity through proper training and support

- Optimizing processes and workflow to ensure your team is working efficiently

- Effective collaboration with internal departments, contractors, and vendors

- Maximizing ROI with on-time, on budget projects

Software Solutions

As the leading provider of Autodesk, Leica Geosystems, and Archibus facilities management software, our experts have certifications and experience in helping customers at any level of any agency. Our understanding of government-mandated requirements along with our industry knowledge allows us to seamlessly work with your agency to determine the right solution implementation and workflow, for both your software and hardware investments.

Professional Services

IMAGINiT's team of CAD, BIM, FM and data management industry experts have more than 25 years of experience assisting government agencies. Our team has the knowledge and expertise to help identify critical issues in your workflow and address them through more effective utilization of your staff, processes, and technology. Our dedicated government team works collaboratively across the federal government, as well as state and local government, providing national coverage.

Consulting
IMAGINiT's consultants can identify inefficiencies and leverage proven strategies for improvement with concrete recommendations to eliminate bottlenecks in workflow.

Implementation
Taking the right steps when adopting new technology is critical. IMAGINiT's TakeAIM methodology offers a repeatable system that mitigates risks and increases adherence to project deadlines and budgets, predictable workloads, high adoption rates and quality user training.

Data Management
IMAGINiT's experienced data management experts help agencies streamline processes, maintain efficiency, and improve audit compliance. IMAGINIT can help you centralize project data securely while allowing employees in remote locations to work together as if they were under the same roof.

Reality Capture
If you're capturing existing conditions digitally—such as a building, field data, aircraft, etc.—leverage IMAGINiT's reality capture expertise. Our reality capture experts help agencies understand how 3D laser scanning, photogrammetry, and LiDAR work as part of a complete design process. Our team has extensive expertise not only with hardware and software, but also the workflows to transform digital data into design and engineering deliverables. We can help you scope your projects the right way, ensuring all stakeholders have a clear understanding of roles and expectations.

Process Automation
Reduce error-prone tasks with Process Automation. Automating manual processes such as searching for and entering information or performing engineering calculations eliminates the need for manual input saving time and budget without sacrificing valuable data.

Facilities Management
As the nation's largest property owner, tracking space and assets can be challenging. IMAGINiT's facilities management team can help government agencies with space optimization, reporting, and compliance documentation on-demand, which supports more efficient building operation and maintenance.

IMAGINiT Training
As the largest Autodesk Authorized Training Center partner in North America, our training programs are offered as classroom-based, custom, instructor led LIVE online and eLearning (on-demand) and are the most comprehensive and flexible in the industry. Maximize your most valuable asset—your people—by keeping their skills up to date through a training offering that fits your needs.
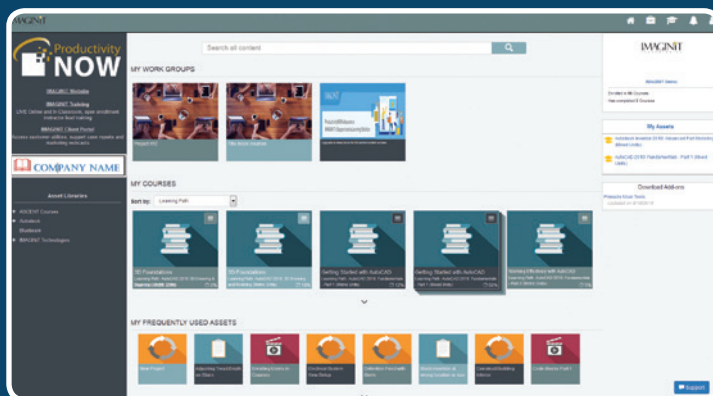

Technical Support and eLearning

The key to increasing productivity is ensuring employees are educated on how to use their Autodesk design software tools effectively and that they have access to experts when problems arise. IMAGINiT offers various levels of support for organizations of all sizes. With IMAGINiT ProductivityNow support options, your teams will have instant access to best-in-class subject matter expertise, dedicated support tools, and high-quality eLearning content designed to derive the most value from Autodesk products.

Maximize productivity with IMAGINiT support and achieve:

- Efficient installation and software troubleshooting with fast response times

- Design assistance for the occasional "how-to" questions

- Enhanced productivity with additional product features, technical and educational resources, and configurable content

- Improved decision-making and greater administrative control with analytics and reporting functions

- Effective communication between all your team members, even when working virtually

IMAGINiT Basic eSupport is included as a complimentary benefit to IMAGINIT customers with products currently on an Autodesk subscription. Our Customer Advocate team is ready to make sure you have an exceptional experience and are readily available to assist you with downloading software, activation, licensing, product keys, and more.

Our powerful eLearning solution provides 24/7 access to high-quality resources to help increase Autodesk software proficiency, and on-demand access to courseware on all major Autodesk products.

ProductivityNOW provides everything you need to be your most productive with 24/7 online access to a wide variety of knowledge tools. The portal contains self-paced eLearning courses, detailed process workflows, short 'topical' how-to videos, and large knowledge base of troubleshooting tips and solutions to frequently asked questions.

IMAGINiT Products + Utilities

IMAGINiT Utilities helps to reduce tedious and time-consuming manual work, automate repetitive tasks across multiple design areas, ensures that vital data is being backed up correctly, maintains pre-determined security standards, and allows your engineers and designers to work more efficiently. Many of these tools are offered at no charge to clients who subscribe to Autodesk products with IMAGINiT. Learn more at www.imaginit.com/Utilities.

IMAGINiT Clarity for Revit

With IMAGINiT's Clarity, you can share files and automate repetitive tasks—all with a simple setup, easy administration, and secure connectivity. Built upon the Autodesk® Revit® Server platform, IMAGINiT Clarity enables better collaboration between Project Managers and Revit users (both inside and outside an organization).

IMAGINiT Pulse Integration Platform

Government agencies maintain a lot of data in a lot of systems. IMAGINiT Pulse SaaS-based systems integration platform, allows you to connect these disparate data sources. IMAGINiT Pulse enables organizations to integrate many different types of applications—independent of platform, programming language or API, while keeping datasets from mission-critical information systems consistent and safe.

In the United States, IMAGINiT works with DLT Solutions to provide state, local, and federal government customers with the expertise needed to meet the challenges of the public sector. As the Autodesk Master Government Aggregator, DLT Solutions assists the public sector in making smart technology choices, simplifies the technology procurement process, and provides state and local government pricing on the GSA schedule for government agencies as well as their prime contractors.

IMAGINiT
TECHNOLOGIES

About IMAGINiT Technologies

IMAGINiT Technologies, a Rand Worldwide Company, is a leading provider of enterprise solutions to the engineering community, including the building, manufacturing, civil and mapping industries. With over 25 years of experience, and 40 offices throughout North America, we provide the expertise, training and support to help companies realize the full power of design technology, maximize ROI and gain competitive advantage.

As an Autodesk Platinum partner, IMAGINiT delivers Autodesk 3D design solutions and is the largest Authorized Training Center in North America. All office locations are supported by a vast pool of engineering resources focused on developing real-life business solutions to our local clients.
