

TD SYNnex Cyber Range: Purpose Cybersecurity Environment Built to Train, Demonstrate and Engage Public Sector Organizations

The combination of rapid information technology (IT) modernization and high-profile security breaches has intensified the pressure on federal agencies, education institutions, the healthcare industry, and state and local governments to protect citizens' data and critical infrastructure. Cybersecurity stands out as the foremost IT challenge and investment focus for chief information officers (CIO). The frequency of cyberattacks is on the rise, with a substantial increase in federal, state, local and education (SLED) organizations reporting daily occurrences. It is imperative for CIOs across all public sector levels to prioritize cybersecurity.

TD SYNnex understands these public sector challenges and created an environment to help solve them, the TD SYNnex Cyber Range, the first ever cyber range hosted by an IT distributor. The Cyber Range creates an interactive and immersive environment to train, demonstrate, and engage public sector channel partners and their customers using the best technologies, processes and most advanced techniques in cybersecurity.

- Train using multiple forms of on-prem and cloud-based public sector-centric learning courses:
 - Incident Response
 - Capture the Flag
 - Red Team vs Blue Team
 - SOC: Threat Hunting
 - SOC: A day at the SOC
- Demonstration of solutions using the best technology, proven public sector processes and most advanced cybersecurity techniques.
 - Access to the most advanced public sector cybersecurity solutions from our technology vendor partners.
 - Develop and test solutions across the cybersecurity ecosystem to meet new public sector challenges in the threat landscape.
- Engage with customers through an interactive public sector learning experience that promotes security solution sales.
- Augment the capabilities of partners by leveraging TD SYNnex's professional and managed security services.
