PEAK EXPERIENCE
FOR PINNACLE SERIES

Featuring new management features, an enhanced end user experience, deepened KnowledgeSmart integration, and powerful AI tools, Peak Experience for Pinnacle Series is truly a foundational release.

MANAGEMENT FEATURES

Peak Experience empowers managers with new content management options that make creating and controlling content easier than ever. Assignments include new permission levels and the ability to assign learning paths, courses, and assessments.

NEW LIBRARY EXPERIENCE:
- New graphical organization for content
- Create blended libraries containing subscription to custom content
- Easily manage publication and visibility
- Faster loading, filtering, and searching

LIBRARY FOR END USERS
The new library experience for users includes a graphical experience that provides better user engagement and access to relevant content. Users will have quick filtering and search options, as well as new sorting abilities within libraries to meet their evolving expectations.

PINNACLE AI

Users can ask questions within the AI chat tool, which provides curated answers citing Pinnacle Series content with links to the source material. Users will have the ability to leverage AI to receive trusted, vetted solutions to their questions.

END USER FEATURES

The **enhanced home page** offers new carousels to navigate assignments and libraries, flags, learning progress on assignments, and a new navigation and quick access search bar.

Assignments will now align learning and assessments side by side. Tile and list views are available with new sorting options. Access both current enrollment and enrollment history.

Access learning and answers quickly in an **improved search interface,** and bookmark items to return to later.

KNOWLEDGESMART USER MANAGEMENT INTEGRATION

User Management. Enable this feature to align user management across the Pinnacle Series and KnowledgeSmart applications. Ensure users are up to date leveraging Pinnacle's EntraID/AD Sync, increase security through anonymization of users, and leverage a single source of truth for user management.

User Sign In. Leverage Pinnacle Series authentication for users to access assessments, surveys, and skills audits—decreasing their need to sign into multiple applications.

NEW AND IMPROVED SEARCH

- New graphical experience with thumbnails
- Updated logic displaying descriptions
- Visibility into learning and video lengths
- Surfacing of topics and difficulty
- Ability to review and enroll in learning from search
- Quick filters to narrow search results
